Technical Writing Task

Scenario:

Your CSE department is planning to develop an **AI-powered Student Support App** called **"SmartCSE Assist."** The mobile application will use Artificial Intelligence to help students with academic planning, course recommendations, assignment reminders, basic programming support, and frequently asked academic questions. The proposed app will collect limited student information such as courses, academic interests, and activity history to provide personalized recommendations. The department wants to submit a short technical proposal to a software/AI company for possible development support. As a CSE student, you have been asked to prepare a **3–5 pages technical document** describing the proposed application.

#First prepare a short technical document titled

Your document must contain the following:

Component	Requirement	Marks
1. Abstract	Write a concise within 60-100 words abstract describing the problem, proposed AI application, major features, and expected benefits.	**2.5**
2. Introduction	Explain the problem addressed by the app and describe at least three AI-based features. Use appropriate technical writing style, clarity, and precision.	**2**
3. Figure	Create one properly labelled figure showing the basic workflow/architecture of SmartCSE Assist, e.g., Student → Mobile App → AI Model → Recommendation/Response. Provide a figure number and caption.	**1.0**
4. Table	Create one comparative table showing at least four AI features, their input/data, AI technique, and expected output/benefit. Give the table a number and suitable title.	**1.0**
5. References & In-text Citations	Use at least 5 credible references related to AI applications, recommender systems, mobile applications, educational AI, privacy, or machine learning. Include at least five corresponding in-text citations using IEEE or APA style consistently.	**2.0**
6. Cover Letter	Write a professional cover letter addressed to the Head of the CSE Department/AI company, briefly introducing the proposed document and explaining why the proposed application is valuable.	**1.5**
7. Technical Writing & Formatting	Follow the specified technical-writing format, including appropriate headings, paragraph organization, clarity, precision, grammar, and professional tone.	**2.5**
Total		**12.5**

Suggested Structure

Students may organize the document as follows:

1. **Abstract**
2. **Problem Statement**
3. **Proposed System**
4. **System Workflow**
   Figure 1. Proposed workflow
5. **Feature Details**
   Table 1. AI-based features and expected benefits.
6. **Expected Benefits and Limitations**
7. **Conclusion**

References

Cover Letter

The cover letter may be placed **before the technical document** or **after the References**, according to the instructor's instruction.

Formatting Requirements

The submitted document must follow these specifications:

- **Paper:** A4
- **Length: 3–4 pages**
- **Margins:** Normal — 1 inch on all sides
- **Font: Calisto MT**
- **Title:** Calisto MT, **16 pt, Bold**
- **Heading 1:** Calisto MT, **14 pt, Bold**
- **Heading 2:** Calisto MT, **12 pt, Bold**
- **Normal text:** Calisto MT, **11 pt**
- **Alignment: Justified** for normal paragraphs
- **Line spacing:** 1.15
- **Paragraph spacing:** Appropriate and consistent
- **Figure:** Must have a **figure number and caption**
- **Table:** Must have a **table number and title**
- **References:** Minimum **5**
- **Citations:** At least **5 in-text citations**
- Use **one citation style consistently**: IEEE **or** APA.
- All figures and tables must be referred to in the text, e.g., *"The proposed workflow is shown in Figure 1."* and *"Table 1 summarizes the major AI features."*
- Avoid unsupported claims and excessive use of AI-generated/general statements.
- Use appropriate **technical vocabulary, concise sentences, and objective academic tone**.
